1. PROJECT INTRODUCTION

WhatNext Vision Motors CRM is a modern vehicle management system designed to transform traditional automotive operations into a smart, automated, and customer-centric platform.

The system helps:

- Manage vehicle inventory
- Automate customer orders
- Assign dealers based on location
- Track vehicle delivery
- Improve customer engagement

This platform enhances efficiency, reduces manual work, and supports intelligent decision-making.

2. BUSINESS OBJECTIVES

2.1 Enhance Operational Efficiency

Automate vehicle ordering, dealer allocation, and inventory management to reduce manual errors and improve workflow speed.

2.2 Improve Customer Experience

Provide seamless vehicle browsing, booking, and real-time order tracking to enhance satisfaction.

2.3 Optimize Dealer Management

Assign the nearest available dealer automatically based on customer location.

2.4 Strengthen Sales & Revenue Tracking

Ensure accurate billing, order confirmation, and revenue tracking through automation.

2.5 Enable Data-Driven Decisions

Provide reports and dashboards for analyzing:

- Sales trends
 - Customer preferences
 - Dealer performance
-

3. FUNCTIONAL SCOPE

3.1 Application Overview

A Salesforce-based or Web-based CRM application named:

👉 **“WhatNext Vision Motors System”**

3.2 Data Model

Custom Objects:

- Customer
- Vehicle
- Dealer

- Order

Relationships:

- Customer → Order
 - Dealer → Order
 - Vehicle → Order
-

3.3 User Interface

- Simple and user-friendly dashboards
 - Separate interfaces for admin and users
 - Easy navigation system
-

3.4 Automation Features

Formula Fields

- Total Price Calculation
 - Vehicle Availability Status
-

Validation Rules

- Prevent ordering unavailable vehicles
 - Validate customer details
-

Flows

- Send order confirmation emails
 - Notify delivery updates
-

Apex Triggers

- Auto-assign nearest dealer
- Update inventory after order

Scheduled Automation

- Send reminders for delivery
 - Notify customers about offers
-

3.5 Analytics

- Sales Reports
- Dealer Performance Reports
- Customer Insights

Dashboards provide visual representation for better decision-making.

4. STAKEHOLDER MAPPING

4.1 Customers

Users who browse and purchase vehicles.

4.2 Dealers

Responsible for fulfilling vehicle orders.

4.3 Admin Staff

Manage system data and operations.

4.4 Managers

Monitor reports and make business decisions.

4.5 System Administrator

Maintains system configuration and security.

5. EXECUTION ROADMAP

5.1 Environment Setup

- Create Salesforce Developer Account
-

5.2 Backend Data Modeling

- Create objects and relationships
-

5.3 Application Setup

- Build Lightning App
 - Create tabs
-

5.4 Backend Logic Implementation

- Formula fields
 - Validation rules
 - Flows
 - Apex triggers
-

5.5 UI Customization

- Design page layouts
 - Improve user experience
-

5.6 Data Population & Testing

- Insert sample data
- Perform testing

The screenshot displays the Coral Cloud Resort CRM interface. At the top, there's a navigation bar with a hamburger menu, a 'Developer Edition' badge, a search bar, and various utility icons. Below this is a main navigation menu with options like 'WhatNext Vision M...', 'Vehicle Customers', 'Vehicles', 'Vehicle Dealers', 'Vehicle Orders' (selected), 'Vehicle Test Drives', 'Vehicle Service Requests', 'Reports', and 'Dashboards'. The central area shows a 'Vehicle Order' record with ID 'o-0001'. A header bar above the record includes 'New Contact', 'Edit', and 'New Opportunity' buttons. The record details are presented in a table-like format with two columns: 'Related' and 'Details'. The 'Related' column lists fields like 'Vehicle Order Number', 'Vehicle Customer', 'Vehicle', 'Order date', 'Status', 'Assigned Dealer', 'Created By', and 'Last Modified By'. The 'Details' column shows the corresponding values: 'o-0001', 'John', 'Honda', '07/03/2026', 'Pending', 'Em', and 'Antony Aruldas'. Each value is accompanied by an edit icon. The background of the interface features a teal and blue abstract design.

Related	Details
Vehicle Order Number	o-0001
Vehicle Customer	John
Vehicle	Honda
Order date	07/03/2026
Status	Pending
Assigned Dealer	Em
Created By	Antony Aruldas, 31/03/2026, 2:22 pm
Last Modified By	Antony Aruldas, 31/03/2026, 2:22 pm

5.7 Analytics Setup

- Create reports
 - Design dashboards
-

5.8 Final Review

- Demo preparation
- Documentation completion

6. ASSUMPTIONS

- Users have internet access
- Vehicles are updated in real-time
- Dealers are available for delivery
- Payments are processed digitally

7. RISKS

- System downtime
- Incorrect dealer assignment
- Data inconsistency
- Delay in notifications

8. FUTURE ENHANCEMENTS

- AI-based vehicle recommendation system
- Mobile application development
- IoT-based vehicle tracking
- Voice assistant integration
- Electric vehicle analytics

9. CONCLUSION

The **WhatNext Vision Motors system** provides a smart and scalable solution for modern automotive business operations. By automating workflows, improving customer interaction, and enabling real-time insights, the system ensures higher efficiency, accuracy, and customer satisfaction.
